

GABRIELLA MITCHELL

mittchell.g@northeastern.edu ◇ 214-984-7816 ◇ Boston, MA ◇ github.com/gabimitchell4

EDUCATION

Northeastern University

Boston, MA

B.S. Computer Science and Design

Expected: May 2026

Awards: Dean's Scholarship, Dean's List, Huntington 100

GPA: 3.98/4.0

Relevant Coursework: Object-Oriented Design, Algorithms & Data Structures, Human-Computer Interaction, Foundations of Data Science, Website Development, Discrete Structures, Fundamentals of Computer Science 1 & 2

TECHNICAL SKILLS

Languages: Python, Java, HTML, CSS, JavaScript, TypeScript, Angular, React, Java Swing, JUnit, Ruby, Racket

Tools: GitHub Repository & Git, AWS, Jira, Playwright, Django, Docker, StrongDM, pgAdmin, Figma, Fullstory

EXPERIENCE

ServiceNow

San Diego, CA

Software Engineer Intern

May 2025-August 2025

- Optimized users' efficiency by automating AI workflows using internal LLaMA LLM and Next Experience UI
- Improved reliability of LLM responses by validating knowledge base using JavaScript preprocessing pipeline
- Led knowledge transfer on scaling LLMs to improve contextual relevance, resulting in 7x context expansion
- Improved accuracy of ops playbook by tuning prompts for text processing using iterative prompt evaluation

Purple Carrot

Boston, MA

Software Engineer Co-op

August 2025-December 2025

- Reduced risk of application failures by enforcing null safety in Typescript codebase, resolving 440+ vulnerabilities
- Increased early user engagement by producing key shopping features using React and Typescript architecture
- Improved UX by synthesizing qualitative user insights from interviews and translating into product requirements

Moody's Analytics / Numerated

Boston, MA

Software Engineer Co-op

January 2024-December 2024

- Developed a financial statement filtering feature using Python and TypeScript, enhancing efficiency for users
- Created end-to-end tests using Playwright to run against staging, identifying latency issues before deployment
- Trained a model utilizing Google's Document AI in a company hackathon to explore future platform benefits
- Implemented robust Django migrations to enhance the database schema and support expanded functionality

TAMID Tech Consulting Group

Boston, MA

Director of Tech Consulting Foundations

December 2022-Present

- Meet with 15 students weekly to provide tailored support for learning fundamental skills of tech consulting
- Teach topics of web development, Git, and APIs, ensuring comprehensive understanding of essential tools
- Guide students through designing, developing, and deploying full-stack software solutions for local startups

Insait

Tel Aviv, Israel

Data Science Intern

May 2023-August 2023

- Conducted Exploratory Data Analysis in Jupyter Notebooks, using Dash to create dynamic visualizations
- Developed interactive plots with user-customizable features, enabling flexible and specialized data exploration
- Collaborated with a tight knit team within the small tech startup and gained experience with pair-programming

PROJECTS

GameNite

Present

- Engineered a real-time multiplayer platform with persistent WebSockets for live gameplay and messaging
- Implemented AI-powered opponents and built the system using Node.js, React, TypeScript, and MongoDB
- Deployed production CI/CD automation pipeline by containerizing services and integrating automated tests

EduFlex

March 2024

- Won 1st place out of 150 students in the inaugural Northeastern AI Hackathon from AI video annotator
- Led the product design of an innovative education platform to enhance the quality of free learning resources
